## Product Description

### Mobile Impact Vertical Shaft Impact Animal Feed Grain Crusher Machine

The vertical crusher is applicable to the crushing of lumps in the production of compound fertilizer, as well as chemical, domestic waste, agriculture, building materials, mining and other industries. During the crushing process, the machine adopts the chain plate with synchronous speed. The design of the inlet and outlet is reasonable, and the crushed materials are uniform, not easy to stick to the wall, and easy to clean.

#### Performance characteristics:

1. Especially for high moisture material, it has strong application and is not easy to block, and the material discharging is smooth.
2. Crushing blade adopts special material, and service life is triple times than other crusher machine.
3. It has high crushing efficiency; being equipped with observation window makes the wearing parts finish replacement in 10 minutes.
