

Fertilizer Aggregate Feed Hopper Forklift Feeding Machine 4Kw

Basic Information

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity:
- Packaging Details:
- Delivery Time:
- Payment Terms:
- Supply Ability:
- 1 According to customer requirements 10-15 days L/C, D/A, D/P, T/T, Western Union, MoneyGram 100 units per month

Product Specification

- Type:
- Core Components:
- Capacity:
- Product Name:
- Output Power:
- Voltage:
- Highlight:

- Feed Pellet Machine
- Gear, Motor, Engine, Pump
- 5-8ton/h

China

TONGDA

TDCW-2030

ISO,CE

- Forklift Feeding Machine
- 4kw Frequency
 - 380v-460V 3 Phases Can Be Customized
 - Fertilizer Aggregate Feed Hopper, Forklift Feeding Machine, 4Kw Forklift Feeding Machine

Product Description

Compound New Type Organic Fertilizer Equipment Making Forklift Feeding Machine

The forklift feeder is a kind of conveying equipment for bulk materials. This equipment can not only convey fine materials with particle size less than 5mm, but also bulk materials more than 1cm. It has strong adaptability, adjustable conveying capacity and continuous uniform conveying of various materials. The equipment is equipped with anti-smashing net, vibration anti-blocking device, frequency conversion speed regulating device, can achieve uniform discharge and accurate control of discharge volume.

Performance characteristics:

1. The slot plate adopts double arc plate to effectively prevent leakage.

2. The traction chain adopts a structure in which load bearing and traction are separated, which improves the ability of the plate feeder to withstand impact load.

3. The tail tensioning device is provided with a disc spring, which can reduce the impact load of the slow chain and improve the service life of the chain.

The chain plate feeder consists of five parts: the head drive device, the tail wheel device, the tensioning device, the chain plate and the frame.
The tail has a shock absorber for shock absorbers, and the middle has a special shock absorber roller support to improve the large block. The material is impacted by the impact of the rollers and the groove plates on both sides to improve the life of the running parts.

Working principle:

The organic fertilizer forklift feeder is composed of a weighing system, a chain plate conveying mechanism, a silo and a frame; wherein the chain plate, the chain, the pin, the roller and the like of the conveying mechanism are wearing parts with different strengths and frequencies. The first wear and tear deformation requires the user to replace; the chain plate feeder has high rigidity and can adapt to a large piece of material with a certain granularity. The volume of the silo is large, which can effectively shorten the feeding time of the forklift, but at the same time the chain plate transmission speed is slow, bearing great ability.

Model	Power	Capacity(t/h)	Dimensions(mm)
TDCW-2030	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	3-10t/h	4250*2200*2730
TDCW-2040	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	10-20t/h	4250*2200*2730

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment. 4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

+8618538527111

We have our own quality control department and have advance quality control stystem while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
