

## 6TPH Organic Fertilizer Crusher Equipment Manure Crusher CE ISO

Our Product Introduction

for more products please visit us on [organicfertilizerequipment.com](http://organicfertilizerequipment.com)

### Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLSF-600
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

### Product Specification

- Product Name: Cage Crusher Machine
- Capacity(ton/h): 6-10
- Raw Material: Organic Manure
- Motor Type: AC Motor
- Application: Organic Fertilizer Equipment Production
- Size Of Inlet: 380\*320mm
- Highlight: **Organic Fertilizer Crusher Equipment, 6TPH Manure Crusher, 6TPH Fertilizer Crusher Equipment**

## Product Description

### Customized Organic Fertilizer Crusher of Manure Animal Manure Crushing Machine

Fertilizer cage crusher is a medium – sized horizontal fertilizer crusher. The machine is designed according to the principle of impact breaking, and the two sets of bars inside and outside make the high-speed phase rotation, then the material is crushed by the impact of the cage bar inside and outside, which is a sharp tool for compound fertilizer crushing.

Model	Power (kw)	Production Capacity (t/h)	Inlet Size (mm)	Dimensions (mm)
TDLSF-600	11*2	4-6	380*320	1500*1500*1500
TDFLF-800	15*2	6-10	300*250	1500*1400*1500

#### Performance characteristics:

- 1.High crushing efficiency, stable operation. The fertilizer cage crusher is simple in structure, with high crushing efficiency, good sealing performance and stable operation, which is convenient for cleaning and maintenance.
- 2.The machine structure is simple and compact, its area is small and the maintenance is convenient; it is also easy to clean; it is a gram of the hard grain material such as ammonium, diammonium and urea.

#### Working principle:

Before using, the machine is placed in a certain position in the workshop without the equipment base, once the power supply is turned on, the machine can be used. The crushing fineness is controlled by double roll spacing. The smaller the spacing, the finer the fineness, relatively the production capacity is lower; the crushing effect will be better if adding material evenly, naturally the production capacity is higher. The equipment can be designed as mobile in accordance with the users' requirements, and the users can move to the corresponding position when using. It is also convenient to remove away when it is not needed.

#### FAQ:

##### 1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

##### 2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

##### 3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

##### 4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

##### 5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

##### 6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
