

2TPH-8TPH Organic Fertilizer Polishing Machine For Animal Waste

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDPY-1000
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 7-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 150 units per month

Product Specification

- Application: Organic Fertilizer Polishing Machine
- Feature: High Productivity
- Voltage: 220V/380V
- Disc Diameter: 1000mm
- Applicable Raw Materials: Organic Manure, Chicken Manure, Poultry Manure.
- Production Capacity: 2-8ton/h
- Highlight: **8TPH Organic Fertilizer Polishing Machine, 2TPH Organic Fertilizer Polishing Machine, 8TPH fertilizer polishing machine**

Product Description

Animal Waste Mixed Granulator Compound Organic Fertilizer Polishing Machine

The organic fertilizer polishing round machine is a throwing round device configured on the basis of the organic fertilizer and compound fertilizer granulator, which enables cylindrical particles to roll into balls at one time, without returning materials, with high balling rate, good strength, beautiful and practical appearance, and is an ideal equipment for making spherical particles of organic fertilizer (biological) today.

Organic fertilizer and compound fertilizer have different shapes and sizes when they are first formed into fertilizer granules. In order to make fertilizer granules look beautiful, our company has specially developed organic fertilizer rounding machine, compound fertilizer rounding machine and other rounding machine series.

Raw materials applicable to organic fertilizer rounding machine:

1. Granulation of bio organic fertilizer with peat, lignite, organic fertilizer sludge and straw as raw materials;
2. Granulation of organic compound fertilizer with chicken manure and other organic fertilizers as main raw materials;
3. Granulation of cake fertilizer with bean cake as the main raw material;
4. Granulation of full price feed and mixed feed with corn, beans and grass flour as raw materials;
5. Granulation of bio feed straw pellet meal with crop straw as raw material.

Model	Production Capacity(t/h)	Matching Power(kw)	Disc Diameter(mm)	Shape Size(mm)
TDPY-800	1-2	5.5*2	800	2800*920*1290
TDPY-1000	2-3	5.5*2	1000	3100*1020*1390
TDPY-1200	3-5	7.5*2	1200	3400*1120*1490
TDPY-1500	5-8	11*2	1500	3200*1550*1600

Working principle:

This organic fertilizer polishing machine is composed of two or more throwing cylinders arranged in sequence. After repeated centrifugal throwing, the material is discharged from the discharge port.

FAQ:

Q1. Are you factory or trade company?

A1. We are manufacturer, we also supply trade service.

Q2. What about your price?

A2. We always supply the products with low price, because we believe this is the way to build long-term business and earn good reputation. Our price is 3%-5% lower than the average market price.

Q3. What payment terms do you accept?

A3. T/T, L/C, D/P, etc can be negotiated.

Q4. How about your delivery time?

A4: Generally, it will take 5-15 working days after receiving your advance payment. The specific delivery time depends on the items and the quantity of your order.

Q5: what will you do if the machine is broken down?

A5: The Products warranty is one year. We will provide the technical advice and find the solution immediately for you when the machine is in trouble. For those wear parts, we guarantee the high quality parts for long-term supply.
