

2-3ton/h Agricultural Waste Crusher Machine Chicken Manure Chain Crusher Machine

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLTF-600
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 3-5 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 300 units per month

Product Specification

- Product Name: Chain Crusher Machine
- Max Feeding Size: 100mm
- Usage: Crushing During Fertilizer Manufacturing
- Capacity(t/h): Max. 10ton/h
- Discharge Size: 0-5mm
- Motor Type: AC Motor
- Highlight: **Agricultural Waste Crusher Machine, Chicken Manure Chain Crusher Machine**

Product Description

2-3ton/h Agricultural Waste Crusher Machine Chicken Manure Chain Crusher Machine

The organic fertilizer chain crusher is applicable to the crushing of lumps in the production of compound fertilizer, and is also widely used in chemical, building materials, mining and other industries. In the process of crushing, the machine uses the wear-resistant hard alloy chain plate with synchronous speed. The design of the inlet and outlet is reasonable, the crushed materials are uniform, not easy to stick to the wall, and easy to clean.

Application of chain crusher:

The organic fertilizer crusher has been used for a long time, which has proved that it is convenient to use, with large production capacity and simple maintenance. It is suitable for crushing various blocky fertilizers and other medium-hard blocky materials. The organic fertilizer chain crusher can crush the phosphate fertilizer calcium superphosphate and a variety of phosphate and compound fertilizer products without drying, which contain 14% water and 6% free acid. It overcomes the shortcomings of the vertical chain crusher and other pulverizers used by many domestic phosphate and compound fertilizer manufacturers in the production operation of materials sticking to the inner wall of the shell, resulting in the inability of production. The horizontal chain crusher enables the crushing process in the production of phosphate and compound fertilizer to achieve continuous production and improve production efficiency.

| Model | Power(kw) | Production Capacity(t/h) | Feed Grain Size(mm) | Output Particle Size(mm) |
|-------------|-----------|--------------------------|---------------------|--------------------------|
| TDLTF-500 | 11 | 1-3 | <100 | ≤3mm |
| TDLTF-600 | 15 | 2-5 | <100 | ≤3mm |
| TDLTF-800 | 22 | 5-8 | <120 | ≤3mm |
| TDLTF-800II | 18.5*2 | 10-15 | <150 | ≤3mm |

Work characteristics:

Organic fertilizer chain crusher This machine has the characteristics of reasonable structure, fast feeding, stable performance and strong impact resistance. It can be used to crush hard objects such as leaves, bagasse, broken bricks, tiles, crushed stones, coal cinders, etc., without affecting the crushing effect on soft and hard objects.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
