TONGDA HEAVY

10kg 20kg Multihead Weigher Packing Machine Fertilizer Weigh Filler Machine

Basic Information

Place of Origin: China
Brand Name: TONGDA
Certification: ISO,CE
Model Number: TD-50
Minimum Order Quantity: 1

Packaging Details: According to customer requirements

Delivery Time: 5-15 days

Payment Terms:
 L/C, D/A, D/P, T/T, Western Union,

MoneyGram

Supply Ability: 100 units per month

Product Specification

Product Name: Feritilizer Automatic Packing Scale

• Driven Type: Electric

• Measuring Range: 5,10,20,25,50Kg Per Bag

• Length Of Conveyor: 2m

Speed: 200bags Per Hour

Machine Height: 1.5m

• Highlight: Fertilizer Weigh Filler Machine,

20kg Multihead Weigher Packing Machine, 10kg Multihead Weigher Packing Machine

Product Description

Automatic Powder Feed Plant Granuel Feed Sack Heat Sealing Packing Bagging Machine

The system is applied to fertilizer automatic weighing, filling, kneading, accumulating weigh and times, stitching and conveying with manual assistant for powder material in the fertilizer factory and other industry.

The organic fertilizer packing machine/packaging machine for fertilizere can be divided into semi-automatic packing machine and automatic packing machine. The packing machine is composed of the automatic quantitative packing scale (including storage hopper, feeder, weighing bucket bag clamping, kneading mechanism, computer control, pneumatic components, etc.) and the optional part(including conveyor machine, sewing machine or welding machine). It adopts screw feeding, and the material is forced out by the feeding mechanism.

Product characteristics:

- 1. There is detecting device in system.
- 2. Processes function of automatic modifying drop height.
- 3. Processes function of self-test, error pilot and fault code indication.
- 4. With the serial interfere to communicate the computer.
- 5. With five-figure password to control the accumulator in system.
- 6. Pre-set filling number in system.

Model	Weighing	Packaging Accuracy		Packaging	Microscopic	Working Environment	
	Range			Rate	Index Value		
Index	(KG)	Per Time	Average	Single	(kg)	Temperature	Relative
				Weighing			Humidity
TD-50	25-50	<±0.2%	<±0.1%	300-400	0.01	-10~40°C	<95%
Special	≥100	Customized processing according to user needs					
model							
Remarks	Sewing machine, automatic counting, infrared thread trimming, edge removal machine, you can choose						
	according to customer requirements						

Functional features of bucket metering packaging machine:

- 1. Equip with safety protection and meet the requirements of enterprise safety management.
- 2. The bucket metering packaging machine can be selected from all stainless steel models and carbon steel plastic spraying models.
- 3. The touch screen can store the packaging process parameters of a variety of different products, which can be used at any time when changing products without resetting.
- 4. The bucket metering packaging machine and metering configuration can automatically complete the whole packaging process of metering, feeding, filling and finished product transportation, and automatically complete counting.

Features of organic fertilizer packing machine/packaging machine for fertilizer:

- 1. High precision: With high precision weighing controller, good stability.
- 2.Good integrity: Small footprint, flexible installation.
- 3.Adjustable speed: The feeding mode of powder materials equipment is screw feeding, fast adding and slow feeding is realized by controller, and feeding speed can be arbitrarily set.
- 4.Environmental protection: Closed internal circulation system, effectively prevent dust flying, improve the working environment, and protect the health of operating personnel.
- 5.Reasonable structure: The automatic machine has the advantages of compact structure and small size, and can be used for making fixed or moving machines according to the requirements of users.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control stystem while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
