

2000L Fertilizer Mixing Equipment Commercial Compost Mixer

Basic Information

Place of Origin: China
Brand Name: TONGDA
Certification: ISO,CE
Model Number: 350
Minimum Order Quantity: 1

• Packaging Details: According to customer requirements

• Delivery Time: 7-15 days

• Payment Terms: L/C, D/A, D/P, T/T, Western Union,

MoneyGram

Supply Ability: 100 units per month

Product Specification

Name: BB Fertilizer Mixer

• Power: 11.5kw

Machine Type: Industiral Blender Mixer Machine

Voltage: 380v Or Custom-madeRange Of Spindle 30 - 200 R.p.m

Range Of Spindle Speed(r.p.m):

Barrel Volume (L): 2000

• Highlight: 2000L Commercial Compost Mixer,

2000L Fertilizer Mixing Equipment, horticultural compost mixers

Product Description

Easy To Operate Mixing Equipment Compost Mixer BB Fertilizer Blender Machine

BB fertilizer mixer, also known as mixed fertilizer mixer, is made by mixing simple fertilizer (or multiple fertilizer) in a certain proportion. The fertilizer mixer is characterized by easy adjustment of the proportion of nitrogen, phosphorus, potassium and trace elements. It can produce various specifications of special fertilizer according to the needs of users, which is more suitable for the needs of soil testing and formula fertilization.

Product advantages:

- 1. The fertilizer mixer equipment covers a small area (square meters).
- 2. Low power consumption (the power of the whole set of equipment is less than kilowatt-hour).
- 3. The main machine of fertilizer mixer is made of industrial grade stainless steel.

Model	Output Capacity(L)	Feed Capacity(L)	Rotating Speed Of Mixer(r/min)	Productivity (m³/h)	Supporting Power(kw)	Mixing And Lifting Motor (kw)
350	350	560	14	10~14	5.5	0.55

Structure of High Capacity 10 Ton Per Hour BB/Bulk Blending Fertilizer Mixer with Good Price This machine can be divided into three parts:

- 1. Frame part: All the working bodies of the machine are fixed on the frame. The frame of the machine is welded by high carbon steel plate and channel steel, and it has reached the purpose of the machine through strict product certification and specific process requirements. Transmission connection part: The motor drives the pulley, the triangle belt and the reducer, and the gear installed on the reducer is bitten by the gear of the body, thus driving the cylinder to work.
- 2. Barrel work part: The cylinder part of the machine is made of special carbon steel plate. The inner wall of the cylinder has a special screw stirring blade. At the same time, the material is entered from the inlet of the cylinder, and the material is stirred evenly through the turn and turn of the special spiral agitation leaves, which avoids the diversion of the mixture in the process of the material-specific gravity and the particle size. 3. The feeding part of the crawling bucket: The feeder part of the machine adopts special process design. The guide rail of the climbing bucket is made of high-quality channel steel, and it is designed in a reasonable angle to make the whole operation smooth and overcome the problem of difficult and easy to run off in the hoist bucket, which was caused by the height limit.

FAQ:

1. Are you trading company or manufacturer?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control stystem while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
