

Manure Fertilizer Coating Machine Rotary Drum Revolving Coating

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDBM-1240
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 7-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Rotary Drum Fertilizer Coating Machine
- Type: Coating Machine
- Voltage: 220V/380V
- Coating Width: 500-2000mm
- Coating Method: Revolving Coating
- Coating Speed: 5-30ton/hour
- Highlight: Manure Fertilizer Coating Machine, Revolving Fertilizer Coating Machine, Rotary Fertilizer Coating Machine

Product Description

Rotary Drum Poultry Manure Organic Fertilizer Pellets Coating Machine for Fertilizer

The rotary organic fertilizer coating machine is designed for small and medium-sized organic fertilizer plants. Because of its high speed and strong impact force, the coating agent can easily adhere to it, and its coating particles are uniform, round, beautiful and effective. It is also equipped with an automatic coating agent feeding system, which is easy to operate and stable for continuous feeding. The coating machine and supporting system are ideal products for organic fertilizer production.

Product structure features:

1. Bracket part: the whole rotating part of the machine body is supported by the bracket, which bears a large force. In consideration of the large friction between it and the rolling belt of the machine body, anti-corrosion and wear-resistant materials are specially selected to greatly improve the service life of the machine. In addition, lifting hooks are set at the four corners of the carrier frame to facilitate loading, unloading and transportation.
2. Drive part: the drive part of the whole granulator is particularly important for the whole machine body. The transmission frame is welded with channel steel and has passed strict quality requirements. The motor drives the pulley, V-belt and reducer to drive to the main shaft to make the machine work. The driving reducer and the main shaft work part are driven by the nylon pin coupling.
3. Body part: The important part of the whole coating machine is the body part, which is welded with medium carbon steel plate, and through strict quality control and specific process requirements, to achieve the purpose of this machine.

Model	Motor Power(kw)	Reducer Model	Installation Tilt Angle(degree)	Rotary Speed(r/min)
TDBM-1240	5.5	ZQ350	2-3	11
TDBM-1560	11	ZQ400	2-3	11
TDBM-1870	18.5	ZQ500	2-3	10
TDBM-2080	22	ZQ650	2-3	10

Organic fertilizer coating machine is one of the equipment in the production of organic fertilizer, inorganic fertilizer, compound fertilizer and compound fertilizer.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
