

Fertilizer Pulverizer Machine 1.5t/H Semi Wet Material Crusher

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDSF-40
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Machine Name: Semi-wet Crusher Machine
- Type: Fertilizer Crusher
- Function: Shattered/crushed
- Machine Type: Fertilizer Crushing
- Capacity(t/h): 1-1.5t/h
- Key Selling Points: Easy To Operate
- Highlight: Fertilizer Pulverizer Machine, 1.5t/H Semi Wet Material Crusher, Semi Wet Material Crusher machine

Product Description

High Capacity Fertilizer Pulverizer Chicken Manure Semi-Wet Material Crusher Machine

The semi-wet material crusher is mainly a new structure model for crushing high wet materials. The semi-wet material crusher is also called high wet material crusher. It is a crusher without screen bottom and clogging. The pulverizer thoroughly solves the problems such as high humidity of materials, difficult crushing and easy blocking.

Model	Power(kw)	Capacity(t/h)	Crushing Granularity(mesh)	Inlet Size(mm)	Dimensions(mm)
TDSF-40	22	1-1.5	50	400*240	1200*1350*900
TDSF-40II	22*2	1-1.5	80	400*240	1250*1600*1300
TDSF-60	30	1.5-3	50	500*300	1300*1450*1300
TDSF-60II	30*2	1.5-3	80	500*300	1500*2150*1920
TDSF-90	37	3-5	50	550*410	1800*1550*1700
TDSF-120	75	5-8	50	650*500	2100*2600*2130

Semi-wet material crusher is a new single-rotor reversible crusher researched by our company for fermented poultry excrement, municipal sludge, drug residue, alcohol residue and water content between 20% and 40%, which is well crushed without screening and without screen. It has strong adaptability to material moisture content, especially for fermented decomposed garbage or other materials with moisture content $\leq 30\%$. The pulverizing particle size can be 20~30 mesh, which can meet the feed particle size requirements of general organic fertilizer, bio-organic fertilizer and powdery organic fertilizer granulation equipment. It is an ideal equipment for organic fertilizer equipment.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
