

1000L Aggregate Batching Machine Fully Automatic Batching Plant

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDDTPL
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram

Product Specification

- Product Name: Dynamic Batching Machine
- Product Type: Fertilizer Production Line
- Batching Accuracy: $\leq \pm 0.2\%$
- Power: 11KW
- Weigh Hopper Capacity: 1000L
- Batching Type: Auto
- Highlight: 1000L Aggregate Batching Machine, 1000L Fully Automatic Batching Plant, Aggregate Fully Automatic Batching Plant

Product Description

Profession Manufacturer Full Automatic Organic Fertilizer Batching Machine

The production of powdered organic fertilizer is relatively simple. The production equipment mainly consists of five parts: organic fertilizer tipper, forklift, quantitative feeder, crusher, and screening machine (drum screen or vibrating screen). The equipment and equipment need to be connected with four sets of belt conveyors to form a complete production line.

1. There is a belt conveyor on the crusher to connect the screened bulk raw materials.
2. A belt above the screening machine is connected with the fermentation material.
3. A belt under the screening machine is connected with the screened finished material, and the finished product is sent to the processing site for weighing and packaging.

Model	Capacity(t/h)	Dimensions(mm)
TDHL-1220	2-5	2300*1400*2400

Features:

1. Fully automatic batching and dosing system
2. various capacity from 5 to 100 tons per hour
3. the Automatic Batching Machine can work with 3 to 10 kinds of raw materials
4. batching accuracy $\leq \pm 0.2\%$
5. According to users needs, can switch the formula at any time
6. With print function, you can print the report at any time
7. With on-site or remote monitoring system function, connected with a large screen display the current recipe
8. Small footprint (ground-type, semi-underground, underground), low power consumption, simple operation. Easy to maintain, reduce investment costs.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
