

Groove Compost Turner Windrower Fermentation Compost Equipment

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLPGD-20000
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 10-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Features: Fertilizer Fermentation
- Product Name: Groove Type Compost Turner
- Raw Material: Organic Manure
- Running Speed: 50m/min Forward 3 Gear
- Working Width: 2000~3500 Mm
- Production Capacity: 6000m³/batch
- Highlight: Groove Compost Turner Windrower, Windrower Fermentation Compost Equipment, Groove compost windrow turner

Product Description

Fermentation Compost Straw Chicken Manure Groove Type Compost Windrow Machine

The groove type compost turner has the advantages of high output, small area of dumping site, complete dumping of materials, more moisture reduction in the fermentation process, stable operation of equipment, and extremely low failure rate. Therefore, tank tipper is the preferred equipment for general organic fertilizer fermentation.

Model	Main Motor Power(kw)	Moving Motor Power(kw)	Trolley Motor Power(kw)	Turning Width(mm)	Turning Depth(mm)
TDLPGD-20000	45	5.5*2	2.2*4	20	1.5-2

Brief introduction:

Groove type compost turner is usually called rail type compost turner, track type compost turner, turning machine etc. It can be used for the fermentation of livestock manure, sludge and garbage, filter mud from sugar mill, bio-gas residue and straw sawdust and other organic waste. The machine is widely used in organic fertilizer plant, compound fertilizer plant, sludge and garbage plant, horticultural farm and bisporus plant for fermentation and the removal of water. The spans can be 3-30 meters and the height can be 0.8-1.8 meters. We have double-groove type and half-groove type to meet the customers' different needs.

The groove type compost turner is a tool to roll, throw away and mix organic solid waste, in order to realize the harmless, resourceful and biological drying treatment of solid waste, so as to turn waste into treasure. It is applied to the production of organic fertilizer, the aerobic composting treatment of municipal garbage and sludge.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
