

## Forklift Compost Turner Fermentation Compost Equipment For Sheep Manure

Our Product Introduction

for more products please visit us on [organicfertilizerequipment.com](http://organicfertilizerequipment.com)

### Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDCCFD-918
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

### Product Specification

- Name: Forklift Type Compost Turner
- Rated Loading Quality: 1800kg
- Rated Bucket Capacity: 1m<sup>3</sup>
- Discharge Height: 3200mm
- Discharge Distance: 850mm
- Product Application: Fermentation Of Organic Fertilizer Raw Materials
- Highlight: **Sheep Manure Forklift Compost Turner, Forklift Fermentation Compost Equipment, Fermentation Forklift Compost Turner**

## Product Description

### Sheep Manure Fertilizer Compost Forklift Turner Organic Manure Waste Turner

The forklift compost turner are widely used for fermenting and tipping of livestock and poultry manure, sludge waste, organic fertilizer plants, compound fertilizer plants, sludge waste plants, horticultural farms, as well as filter mud and straw sawdust and other organic wastes from mushroom planting sugar plants.

Stir the fermentation materials evenly and thoroughly to make the bacteria fully contact with the raw materials, thus promoting the complete decomposition of the fermentation products.

Model	TDCCFD-918(Manual operation)	TDCCFD-920(Automatic operation)
Number of cylinders	4	4
Discharge	2.545	2.545
Power/Speed(kw/r/min)	47/3200	47/3200
Max Torque/Speed(N.m/r/min)	157/200~2200	157/200~2200
Forklift Bucket Width(mm)	1300	1300
Diesel Engine Model	4DW81-37G2	4DW81-37G2
Cooling Method	Closed Forced Water Cooling	Closed Forced Water Cooling

#### The forklift compost turner working principle:

The machine adopts four-wheel walking design, which can move forward, reverse and turn, and is controlled and driven by one person. During driving, the whole vehicle rides on a long strip of fertilizer base that has been stacked in advance, and the fertilizer base raw materials are mixed, fluffy, and piled by the rotating cutter shaft hung under the frame. After passing the vehicle, the new strip pile is formed. The machine can be operated in open outdoor open space or in the workshop shed.

#### FAQ:

##### **Q: Can I use this production line to produce multi granularity particles?**

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

##### **Q: I know little about the fertilizer production line. How to choose the most suitable machine?**

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

##### **Q: Our workers don't know how to operate the production line. What should I do?**

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

##### **Q: Are you a trading company or a manufacturer?**

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

##### **Q: What's the Production Period of the Fertilizer Machine?**

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

##### **Q: What's the Quality Guarantee and Certifications?**

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
