

Chicken Manure Horizontal Fermentation Tank Organic Fertilizer Compost Turner

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: 15m³
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 10-15days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Name: Horizontal Fermentation Tank
- Keywords: Bio-organic Fertilizer Turner
- Suitable For: Waste Fermentation
- Material: Customized
- Processing: Fermenting Equipment
- Voltage: 220V/380V
- Highlight: **Chicken Manure Horizontal Fermentation Tank, Organic Fertilizer Compost Turner, Compost Turner Horizontal Fermentation Tank**

Product Description

High Temperature Chicken Dropping Manure Horizontal Fermentation Mixing Tank

Bio-organic Kitchen Food Waste Fertilizer Fermentation Equipment is used for treatment of pig manure, chicken manure, cattle/cow manure, sheep manure, mushroom waste, Chinese medicine waste, crop straw and other organic waste. Organic Waste Fermentation Tank Machine is a new type integrated compost machine, which has functions of waste collection, storage, aerobic fermentation and compost, etc. It is mainly designed for the collecting daily fresh manure, waste, animal carcasses of livestock and poultry farms.

Model	Heating Power(kw)	Stirring Power(kw)	Reducer Model	Stirring Speed(r/min)	Dimensions(mm)
15m³	30	22	ZQD850-291.19	3.4	6000*2600*2800
20m³	30	37	ZQD850-163.38	6	7400*2820*3260

In the fermentation process, aeration, control, agitation, deodorization and automatic control, the discharge device is started to discharge quickly when discharging. Full automation control without manual operation.

The fermenter consists of a fermentation silo, a spindle drive system, a hydraulic power unit, a feed propulsion system, a high pressure air supply system, a deodorization system and an active control system. It can be used to treat organic waste such as pig manure, chicken manure, cow dung, sheep manure, mushroom residue, Chinese medicine residue, crop straw, etc. It can be harmlessly treated within 10 hours, with less land occupation (fermenter only covers land) 10 -30 square meters), no pollution (closed fermentation), completely kill pests and eggs (can be adjusted to 80-100 degrees high temperature), suitable for a large aquaculture enterprises, recycling agriculture, ecological agriculture. In addition, according to customer needs, we can customize 5-200 cubic meters of different capacity, different methods (horizontal, vertical) fermenters.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
