

75HP Fermentation Compost Equipment Crawler Small Scale Compost Turner

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDLDF-2500
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 3-7 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

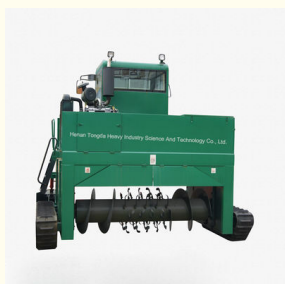

Product Specification

- Product Name: Crawler Type Compost Turner
- Tipping Height: 1200mm-1500mm
- Stacks Row Spacing: 0.8-1m
- Power: 75 HP
- High Speed: 2400 Rpm
- Working Speed: 5-10 M/min
- Highlight: Crawler Small Scale Compost Turner, 75HP Fermentation Compost Equipment, 75HP Small Scale Compost Turner

Product Description

Organic Waste Manure Crawler Type Compost Fertilizer Turner for Compost Machine

The fertilizer compost windrow turner is widely used for dealing with animal manure, household garbage, sludge, crop stalks and other organic wastes, and also can be used in feed fermentation.

Organic fertilizer groove type bread fermentation tank is the most widely-used as aerobic fermentation compost machine and compost turning equipment. The organic fertilizer waste compost turner machine includes walking fermentation groove, walking track, turning teeth, power-pick device and other parts. The working portion of the compost windrow turner machine adopts advanced roller drive. There are adjustable type and non-adjustable type for choice.

Crawler type compost fertilizer are suitable for tippers of various types of materials:

1. Viscous materials (livestock manure, activated sludge, etc.).
2. Loose materials (agricultural organic waste, urban living waste, etc.).
3. Winding materials (straw, straw, etc. for mushroom straw fermentation).

Model	TDLDF-2400	TDLDF-2600	TDLDF-3000	TDLDF-3000 (Full Hydraulic)
Turning Width(mm)	2400	2600	3000	3000
Turning Height(mm)	600-1000	1100-1300	1300-1500	1600-1800
Row Spacing(mm)	800-1000	800-1000	800-1000	100-1000
Max.Diameter of Material Particles(mm)	250	250	250	250
Power(horsepower)	75	116	136	143
Working Knife Diameter(mm)	400	500	500	800
Working Speed(m/min)	6-10	6-10	6-10	6-10
Capacity(m ³ /h)	500-700	1000-1200	1300-1500	1500-1800

When windrow compost turner for organic fertilizer starts to work, it straddles the strip-type compost heap and the rotary cutter shafts under the rack stir and mix the material. The operation can be completed not only in the open area but also in the workshop and greenhouse. One of the cow dung compost fertilizer turner machine 's technical breakthroughs is to integrate the crushing function at the later stage of the material fermentation. With the continuous dehydration of the material, the cutter shafts can effectively crush the caking formed during the fertilizer fermentation. Thus the production does not need to equip an additional crusher, the crushing efficiency is greatly improved and the cost is largely reduced.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days;and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
