

## 11Kw Dynamic Batching Machine Compound Fertilizer Equipment Multiple Silos

Our Product Introduction

for more products please visit us on [organicfertilizerequipment.com](http://organicfertilizerequipment.com)

### Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDDTPL
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram

### Product Specification

- Product Name: Dynamic Batching Machine
- Product Type: Quantitative Feeding Batching Machine
- Number Of Hoppers: 3-8
- Power: 3-11kw
- Capacity: 500-750kg/batch
- Power Type: Electric
- Highlight: **11Kw Dynamic Batching Machine, Multiple Silos Compound Fertilizer Equipment, Multiple Silos Dynamic Batching Machine**

## Product Description

### Fertilizer Production Line Multiple Silos Single Weigh Static Automatic Batching System

Multiple silos single weigh static automatic batching system is mainly used for the mixing, batching and feeding of 3-8 kinds of materials. The machine adopts computer scales for automatic control, and uses pneumatic valves to control the main material warehouse for quantitative feeding. After the materials are mixed in the mixing silo, they are automatically sent out by the belt conveyor.

Model	Capacity(t/h)	Dimensions(mm)
TDHL-1220	2-5	2300*1400*2400

#### Automatic Batching System Advantage:

The machine has the advantages of simple operation, high material accuracy, adjustable material ratio, high efficiency, energy saving, easy installation and good mobility.

#### Automatic batching machine function:

1. It integrates ingredients, mixing and packaging, and ingredients, mixing and packaging are automatic.
2. Mix one or more materials of different products automatically according to the weight ratio specified in the formula, and then measure, fill and pack them automatically according to the specification of 5-60kg/bag.
3. Process flow design of the production line, equipment structure design, and material selection can select q235 carbon steel, 201 stainless steel, 304 stainless steel, and 316 stainless steel according to the characteristics of the material.
4. For special materials: if it contains crystal water, it is easy to absorb moisture and liquefied at high temperature; The equipment of this production line has fast batching and mixing speed, and the materials in the production process have little contact time with the air, and will not absorb water and regain moisture.
5. Measure, the batching accuracy is  $\pm 0.1\%$  -  $\pm 0.2\%$ , and mix evenly.
6. The batching system can store several formulations, and the formulation of stainless steel is convenient; It can realize various specifications of ingredients and packaging of 5-60kg bags.

#### FAQ:

##### **Q: Can I use this production line to produce multi granularity particles?**

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

##### **Q: I know little about the fertilizer production line. How to choose the most suitable machine?**

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

##### **Q: Our workers don't know how to operate the production line. What should I do?**

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

##### **Q: Are you a trading company or a manufacturer?**

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

##### **Q: What's the Production Period of the Fertilizer Machine?**

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

##### **Q: What's the Quality Guarantee and Certifications?**

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
