# **5TPH Automatic Batching System Organic Fertilizer Equipment Energy** Saving

# **Basic Information**

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity:
- Packaging Details:
- Delivery Time:
- Payment Terms:
- 1 According to customer requirements 5-15 days L/C, D/A, D/P, T/T, Western Union, MoneyGram

# **Product Specification**

- Product Name:
- Applicable Industries:
- Machine Type:
- Power Type:
- Core Components:
- Power:
- Highlight:

- Organic Fertilizer Batcher Machine
- Fertilizer Production Line
- **Batching Machine**
- Electric

China

TONGDA

CE,ISO

TDDTPL

- PLC, Motor 7.5KW
- - 5TPH Automatic Batching System, 5TPH Batching Organic Fertilizer Equipment, Fertilizer auto batching system

**Our Product Introduction** 

## **Product Description**

#### Organic Fertilizer Raw Material Batching Machine Automatic System Batching

Automatic Batching System machine has the advantages of simple operation, high material accuracy, adjustable material ratio, high efficiency, energy saving, easy installation and good mobility.

The automatic batching machine is mainly suitable for mixing, batching and feeding of 3-8 kinds of materials. The system is automatically

controlled by a computer scale. The pneumatic valve is used to control the material supply in the main bin. The material is mixed in the mixing bin and sent automatically by the belt conveyor.

Model	Capacity(t/h)	Dimensions(mm)
TDHL-1220	2-5	2300*1400*2400

#### Functional characteristics of the batching bin:

1. The equipment is simple and flexible to operate, and can set the type and proportion of ingredients at will according to the user's production requirements, which greatly saves manpower and improves production efficiency.

The electronic belt weigher adopts a fully suspended idler mechanism without mechanical transmission frame; The metering control instrument with multi-window display, multi-channel sensor output, automatic speed calibration, dynamic peeling and functions of anti-deviation, slipping, blocking and other alarm detection devices is adopted, with high accuracy, high reliability, maintenance-free and fast speed.
The mixer is mixed evenly while discharging, continuous production, stable operation and production, up to 5~60 tons per hour.

### FAQ:

### <u>Q: Can I use this production line to produce multi granularity particles?</u>

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

#### <u>Q: Are you a trading company or a manufacturer?</u>

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

#### Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

#### Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
