

3M-6M Groove Type Compost Turner Poultry Manure Compost Turner

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLPGD-20000
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 10-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Features: Fertilizer Fermentation
- Product Name: Groove Type Compost Turner
- Machine Type: Fertilizer Turning Machine
- Raw Material: Organic Manure
- Voltage: 220V/110V/380V/415V/as Your Request
- Working Width: 3-6M
- Highlight: 6M Groove Type Compost Turner,
3M Groove Type Compost Turner,
Poultry Manure Compost Turner

Our Product Introduction

Product Description

Poultry Manure Organic Fertilizer Fermentation Machine Groove Type Compost Turner

The groove type compost turner adopts motor power and full hydraulic transmission and control; Integral welded frame, compact structure, strong and durable; High stacking efficiency, with the functions of crushing, mixing, dumping and stacking, and uniform and neat stacking after stacking; The rotating teeth of the tipping rotor can be removed, and the standard parts are convenient for maintenance; Convenient operation, flexible turning, and adjustable walking speed. The groove type compost turner is a practical tippler equipment for organic fertilizer production. It is made of two fixed guide rails to let the tippler walk back and forth for tippler.

Model	Main Motor Power(kw)	Moving Motor Power(kw)	Trolley Motor Power(kw)	Turning Width(mm)	Turning Depth(mm)
TDLPGD-20000	45	5.5*2	2.2*4	20	1.5-2

Chicken Manure Organic Fertilizer Fermentation Machine Groove Type Compost Turner:

It is used for fermentation and turning of organic wastes such as livestock and poultry manure, sludge waste, sugar mill filter mud, slag cake and straw sawdust, etc. It is widely used in organic fertilizer plants, compound fertilizer plants, sludge waste plants, gardening In the field, the compost is fermented and decomposed and the moisture removal operation is carried out.

The equipment is suitable for aerobic fermentation and can be used with solar fermentation chambers, fermentation tanks and moving machines. The matching fermentation tank can discharge materials continuously or in batches, and has the characteristics of high efficiency, stable operation, firmness and durability, and even throwing.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
