

Sawdust Briquette Maker Fertilizer Crusher Equipment 400-1000kg/H

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDMF-600
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Wood Crusher Machine
- Capacity: 400-1000kg/h
- Application: Wood Processing
- Power: 7.5 KW
- Raw Material: Straw Grass Wood Branches
- Related Machine: Wood Sawdust Briquettes Making Machines
- Highlight: 1000kg/H Sawdust Briquette Maker, 400kg/H Sawdust Briquette Maker, sawdust briquette machine

Product Description

Sawdust Making Machine Wood Crusher Tree Branch 400-1000kg/h Crusher Machine

This multifunctional wood crusher machine is an energy saving type ,small in size ,and powerful , which is mainly used for crushing the hardwood into sawdust size at 1-40mm.It can also crush small deiameter biomass mterrails such as wood chips,straw,garin and so on.

The wood pulverizer is composed of three parts: the body, the middle body and the lower body. The middle body is equipped with three large stator coils, a crushing cutter head and a fineness analyzer. The main machine adopts alloy cutter head. It has high wear resistance and thus increases the output. It has the functions of coarse crushing, fine crushing and centrifugal crushing. The motor drives the rotor of the crusher to run at high speed, which makes the machine produce high speed air flow to produce high strength impact force, compression force and cutting force on the crushed materials, and achieves the unique crushing function. Wood pulverizer is a new type of woodworking machinery and equipment for the production of wood series. The components of the wood pulverizer are mainly composed of shell, bearing, screen, drive wheel and groove frame. All materials are cast from manganese steel.

Model	420	500
Diameter of cutter head (mm)	400	450
Number of blades	4	4
Spindle speed (mim/h)	2800	2600

Scope of application:

The wood pulverizer is suitable for crushing the following materials: bamboo powder, fruit shell, Chinese herbal medicine, bark, leaves, wheat bran, konjac, Xuanma, rice husk, corncob, straw, starch, grain, shrimp skin, fish meal, shell, seaweed, dehydrated vegetables, hawthorn, dried ginger, garlic slices, pumpkin powder, seasoning, jujube, paper, circuit board, plastic, chemical raw materials, marine products, condiments, feed, mica, graphite, bentonite Pearlite, distiller's grains, furfural, cakes, charcoal, activated carbon, cellulose, potato residue, tea, hair, soybean meal, cotton, refined cotton, cowhide, sheepskin, plant roots, stems, leaves, flowers, fruits, various edible fungi and other hundreds of difficult characteristics of material processing, is an ideal crusher in the chemical, building materials, medicine, health care, aquaculture, food, mosquito repellent incense and other industries.

Crushing effect of wood crusher

10 mm screen mesh

8 mm screen mesh

3 mm screen mesh

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days;and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
