

Sieving Fertilizer Rotary Drum Screening Machine For Small Block Material

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDGS-1020
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 150 units per month

Product Specification

- Product Name: Rotary Screening Machine
- Usage: Powder, Granular, Small Block Material
- Sieve Material: Organic And Compound Fertilizer
- Capacity: 1-25ton/hour
- Function: Screening\separation\sorting\sieving
- Color: Customized
- Highlight: Fertilizer rotary drum screening machine, Sieving Drum Screening Machine, Sieving Fertilizer Screening Machine

Product Description

Sieving Fertilizer Granules Organic and Compound Fertilizer Drum Screening Machine

The fertilizer screening machine has strong adaptability to materials, and can screen materials of various properties such as viscosity, high humidity, dirt and miscellaneous. The feeding mode is diversified, that is, manual mode and mechanical transmission, which can be produced in large quantities. The central screen is designed with annular flat steel ring, with good wear resistance, long service life, simple structure and convenient maintenance. Different screen materials, mesh sizes, high screening efficiency, long service life and low maintenance costs can also be used according to customer requirements.

Features of organic fertilizer drum screening machine:

1. The screening efficiency is high, which can realize the screening of materials between 2-80mm, and the screening of materials of 1-5 grades.
2. According to the needs of material screening, the screen with various sizes of mesh can be replaced at any time, and one machine can be used for multiple purposes.
3. Small size, low power.

Model	Power(kw)	Reducer	Drum Speed(r/min)	Screening Capacity(t/h)
TDGS-1020	3	ZQ250	21	1-2
TDGS-1030	3	ZQ250	21	2-3
TDGS-1240	4	ZQ250	18	3-5
TDGS-1540	5.5	ZQ350	16	5-8
TDGS-1560	5.5	ZQ350	16	6-10
TDGS-2080	11	ZQ450	12	10-20

Main features:

1. The sieve hole is not easily blocked;
2. Stable operation and low noise;
3. Simple structure and convenient maintenance;
4. The whole machine has high reliability and less one-time investment;
5. Special screen is adopted, with high screening efficiency and long service life.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
