

Organic Fertilizer Forklift Feeder Machine 10-20t/H Fully Automatic

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDCW-2030
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Function: Fertilizer Production Line
- Product Name: Fertilizer Forklift Feeder Machine
- Power: 5.5KW
- Voltage: 220V/380V
- Type: Fully Automatic
- Material: Carbon Steel Or Stainless Steel
- Highlight: **Organic Fertilizer Forklift Feeder Machine,
Organic Fertilizer Forklift Feeder,
Auto Fertilizer Forklift Feeder**

Product Description

Organic Fertilizer Equipment Mixing Storage Silo Forklift Feeding Machine

Forklift feeding machine is mainly used for conveying materials of loader loading of powder materials and other organic and inorganic raw materials in fertilizer industry. It also has the function of breaking and mixing loose bulk material. The main engine can be used as a speed regulating motor, and this hopper is suitable for the uniform feeding of the crusher in fertilizer production. The machine is simple in operation, no need for civil construction, good flexibility and saving labors.

Model	Power	Capacity(t/h)	Dimensions(mm)
TDCW-2030	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	3-10t/h	4250*2200*2730
TDCW-2040	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	10-20t/h	4250*2200*2730

Working principle:

The organic fertilizer forklift feeder is composed of a weighing system, a chain plate conveying mechanism, a silo and a frame; wherein the chain plate, the chain, the pin, the roller and the like of the conveying mechanism are wearing parts with different strengths and frequencies. The first wear and tear deformation requires the user to replace; the chain plate feeder has high rigidity and can adapt to a large piece of material with a certain granularity. The volume of the silo is large, which can effectively shorten the feeding time of the forklift, but at the same time the chain plate transmission speed is slow, bearing great ability.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
