

Automatic Bag Palletizer Compound Fertilizer Equipment Bag Palletiser

Basic Information

Place of Origin: China
Brand Name: TONGDA
Certification: CE,ISO
Model Number: TDMD-500

Minimum Order Quantity:

• Packaging Details: According to customer requirements

Delivery Time: 5-10 days

• Payment Terms: L/C, D/A, D/P, T/T, Western Union,

MoneyGram

Supply Ability: 100 units per month

Product Specification

Product Name: Fertilizer Stacker
 Palletizing Speed: 1200bags/hour
 Voltage: 380v 50hz 3phase
 Working Environment: -10~45celsius

• Feature: Simple Operation Easy Maintenance

Packaging Type: Bags

• Highlight: Fertilizer Automatic Bag Palletizer,

Bag Palletizer Compound Fertilizer Equipment, Compound Fertilizer Equipment Bag Palletiser

Product Description

Bag Palletizing Machine Automatically Composite Compound Fertilizer Bags Stacker

The automatic palletizer system is composed of an electrical control system and mechanical equipment. The electrical control system automatically controls and coordinates the actions of each mechanism and equipment of the palletizing system, so that the palletizer completes the entire palletizing process according to the set process stack type.

Product features:

- 1. The structure is very simple, easy to maintain and repair; The main components are few parts and accessories, so the maintenance cost is very low.
- 2. The floor area is small, which can make more space for storing materials.
- 3. The control can be operated on the screen of the control cabinet, and the operation is simple.
- 4. It can work for a long time to replace the three to unknown employees, improve production quality and output, reduce costs and increase efficiency
- 5. It can be customized according to the size of the tray and the site demand.

Model	TDMD-500	
Palletizing Speed	500	
Mainframe Size (mm)	3200*2200*3000	
Power (kw)	7	
Voltage(v)	380	
Palletizing Height (mm)	600-1600	
Stacking Layer Number	1-10	
Palletizing Station (bag)	4-8	
Gas Supply Pressure (Mpa)	0.6-0.8	
Weight (kg)	2000	
Due donat a donamic man.	•	

Product advantages:

- 1. The structure of fertilizer stacker is very simple and easy to maintain and repair;
- 2. There are few main components and accessories, so the maintenance cost is very low;
- 3. The fertilizer stacker with woven bags can be set in a narrow space and can be used effectively; All controls can be operated on the screen of the control cabinet, which is very simple.
- 4. Scope of application: packing and stacking of finished products in woven bags such as feed, fertilizer, flour, cement and starch.
- 5. Advantages of the stacker: stacking heavy goods. The advantages of the stacker are long service life and low failure rate.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
