

## Compound Fertilizer Granulating Machine Double Roller Extrusion Granulator 45kw

Our Product Introduction

for more products please visit us on [organicfertilizerequipment.com](http://organicfertilizerequipment.com)

### Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDJZ-1.5T
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: According to customer requirements
- Delivery Time: 7-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

### Product Specification

- Name: Compound Fertilizer Granulating Machine
- Capacity: 1-1.5ton/h
- Granule Size: 3/4/5/6mm
- Power: 11-45kw
- Voltage: 220V/380V
- Application: Making Compound Fertilizer, chemical Fertilizer
- Highlight: **Compound Fertilizer Granulating Machine, Double Roller Extrusion Granulator, 45kw Fertilizer Granulating Machine**

## Product Description

### Compound Fertilizer Granulating Machine Double Roller Extrusion Granulator

Double roller extrusion granulator is the key equipment for compound fertilizer granulation. It has the advantages of advanced technology, reasonable design, compact structure, novelty and utility, low energy consumption. It can support the corresponding equipment, forming a small production line to achieve a certain capacity of continuous, mechanized production.

Model	Power(kw)	Granule Diameter(mm)	Roller Sheet Size(mm)	Dimensions(mm)
TDJZ-1T	15	3-10	150*220	1450*800*1450
TDJZ-1.5T	22	3-10	150*300	1450*850*1500
TDJZ-2T	30	3-10	185*300	1630*850*1650
TDJZ-3T	37	3-10	300*300	1850*1100*2050

It adopts eugenic formula, does not need to be dried, and is produced at room temperature. The product is formed by rolling at one time, so that the product quality meets the technical index requirements of compound fertilizer. It is a special compound fertilizer and compound fertilizer industry for the production of various crops with high, medium and low concentrations. Renewal products for energy saving and consumption reduction.

#### Double Roller Extrusion Pellet Granulator Machine:

1. The granulating machine for the roller extrusion granulator has a particularly good granulation effect on ammonium bicarbonate, ammonium chloride and monoammonium phosphate. The sphericity rate can reach more than 85%.
2. There is no drying process for the roller extruder, granulation at room temperature, one molding.
3. The power is small, reliable operation, waste discharge, stable operation, advanced technology and low production cost.
4. It has wide adaptability to the raw materials of the roll granulator. It can be used for granulation of various raw materials such as compound fertilizer, medicine, chemical, feed, coal, metallurgy, etc., and can produce various concentrations and types compound fertilizer.

#### FAQ:

##### 1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

##### 2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

##### 3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

##### 4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

##### 5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

##### 6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
