Advantages of powder line:

1. Fit for new starter in fertilizer making field.
2. Small investment, high return.
3. If you want to expand the scale of production or transform into granular fertilizer into a production line, the powder fertilizer production equipment can still be used without waste.
4. The organic matter content is high, which has a significant effect of improving soil and fertilizing.
5. The nutrients contained are comprehensive, but the content is low, and the fat is small.
6. The fertilizer supply time is long, the fertilizer effect is slow and lasting.
7. It can fully integrate with the soil to form an organic complex, so the loss is small and the utilization rate is high.
