

Manure Fertilizer Granules Production Line Compost Machine Organic Chicken

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

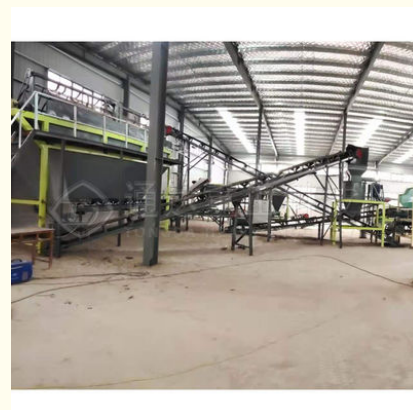

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDFZ
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 10-15days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10 units per month

Product Specification

- Application: Fertilizer Granules Production Line
- Voltage: 220V/380V/415V/600V
- Acceptable Raw Materials: Chicken Manure, Cow Dung, Sheep Dung
- Type: Granule Making Equipment
- Suit For: Granulator Organic Fertilizer Processing Plant
- Capacity: 10000-300000T/Y
- Highlight: **Manure Fertilizer Granules Production Line, Organic Chicken Compost Fertilizer Machine, 415V Organic Compost Fertilizer Machine**

Product Description

Compost Fertilizer Making Machine Organic Chicken Manure Fertilizer Granules Production Line

Fertilizer Granules Production Line Process: using the pile machine after fermentation, fermentation of organic materials will be shattered - mixer to raw material mix - granulation particle machine, dryer to grain moisture evaporate - cooling machine rapidly down the particle temperature screening machine will not be qualified particle filter out particles crushing granulation again - qualified coated organic fertilizer product quantitatively bags - eventually. The complete set of organic fertilizer production line is much more than the simple configuration of the dump machine, dryer, cooling machine and envelop machine.

Key Selling Points	High Productivity
Applicable Industries	Manufacturing Plant, Farms, Energy & Mining, Other
Product Name	Poultry waste Pig manure composting Organic fertilizer production
Application	Organic Fertilizer Production Line for farm
Raw material	Chicken manure, cow dung, sheep dung
Usage	Making Organic Fertilizer Pellets
Granulation rate	95%
Raw material moisture	20-40%
Granules shape	Round ball type
Granules size	2-6mm
Drying Temperature (°C)	350±30°C
Output Capacity(t/h)	4.47

Characteristics of Fertilizer Granules Production Line:

1. Strong adaptability. Suitable for the different formulations, different moisture content, and different concentrations of the compound fertilizer and organic fertilizer.
2. Unique drying and cooling processing and handling. It can be sufficient to drying and cooling material, and again spheronization and polishing on pellets.
3. Low temperature drying technology. It can produce the rich in active microbial ecological fertilizer.
4. Advanced technological processing design. The advantage of equipment layout is reasonable, compact structure, small spatial footprint.
5. Using the rotary drum dryer by the main hosts of system. The advantage is strong adaptability, easy operation, and running stability, and most reliability.
6. The hot air furnace could choose oil, gas, coal, biomass and other efficient automatic (or manual) hot air furnace as heat source. The advantage is reasonable design, high thermal efficiency, and low drying cost.
7. Unique sealing device. It can be increasing the efficiency, without dust particles, and improve the operating environment
8. Suitable for the different desired customers that have different production capacity requirement. For example, the requirement capacity of 1-20 million tons per year.

FAQ:

1..How should to do if I meet some trouble while using?

A:The English manual book and video will be provide for showing how to resolve the problems, if necessary, we will dispatch our engineer to your factory.

2. Do you provide the installation service afterordering your machines?

A:As for the single machine, we provide the users instruction and operation video.As for the production line,we provide the professional construction drawing,and arrange the engineer guide the user install the machines.Help the user train the skilled workers.

3.Can we visit your factory to see some fertilizer plant with your machine?

A:We really give every customer a warm welcome to visit our factory,and we can take the customer to visit fertilizer plants with our equipment. Animal manures fertilizer pellet production line /organic fertilizer granulator production line for sale , inquiry now:)
