

Organic Fertilizer Fermentation Machine Chicken Manure Wheel Type Compost Turner

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLPGD-20000
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Features: Composting Height 3m
- Product Name: Wheel Type Compost Turner
- Voltage: 220V-440V
- Production Capacity: 500-1000 M³/day
- Application: Waste Organic Composting Machine
- Turning Width: 30m
- Highlight: **Organic Fertilizer Fermentation Machine, Chicken Manure Wheel Type Compost Turner, 220V Wheel Type Compost Turner**

Product Description

Organic Fertilizer Fermentation Machine Chicken Manure Wheel Type Compost Turner

Wheel type compost turner it is used for fermentation and turning of organic wastes such as livestock and poultry manure, sludge waste, sugar mill filter mud, slag cake and straw sawdust, etc. It is widely used in organic fertilizer plants, compound fertilizer plants, sludge waste plants, gardening. In the field, the compost is fermented and decomposed and the moisture removal operation is carried out.

The wheel type compost turner is suitable for aerobic fermentation and can be used with solar fermentation chambers, fermentation tanks and moving machines. The matching fermentation tank can discharge materials continuously or in batches, and has the characteristics of high efficiency, stable operation, firmness and durability, and even throwing.

Model	Main Power (kw)	Walking Power (kw)	Trolley Power (kw)	Turning Width (m)	Turning Depth (m)
TDLPPD-20000	45	5.5 x 2	2.2 x 4	20	1.5 ~ 2
TDLPPD-20000	55	5.5 x 2	2.2 x 4	22	1.5 ~ 2

Wheel Type Compost Turner Feature advantages:

1. The throwing depth can reach 1.5~3 meters.
2. The throwing span can be up to 30 meters wide.
3. Low energy consumption, using high-efficiency and energy-saving transmission mechanism, under the same operation, the energy consumption is reduced by 70% compared with the traditional turning equipment.
4. Flexible flipping, the roulette wheel flips symmetrically, and there is no dead angle flipping.
5. High degree of automation, equipped with automatic electrical control system, no need for personnel to operate during work.

Single and double wheel type compost turner is suitable for the fermentation and turning of organic wastes such as pigs, cattle, sheep and chickens, sludge and waste, sugar mill filter mud, slag cake and straw sawdust. It is widely used in organic fertilizer plants. Compared with the traditional trough type turning machine, the fermentation and decomposing and water removal operations of compound fertilizer plants, sludge waste plants, horticultural fields, and Agaricus bisporus planting plants greatly save space, and the dead corners are turned and the turning range is wide. The depth of tumbling is deep, the tumbling is even, and the tumbling efficiency is high.

FAQ:

Q1: Are you trading company or manufacturer?

A: We are factory.

Q2: How long is your delivery time?

A: Generally it is 7-10 days if the goods are in stock. Or it is 15-30 days if the goods are not in stock, it is according to quantity.

Q3: What is your payment method?

A: 30% of total prices should be paid by T/T as down payment; 70% balance payment should be paid by T/T before delivery.

Q4: How long is the warranty of your equipments? Does your company supply the spare parts?

A: The warranty period of fertilizer equipments is one year. And we will supply the spare parts for you at lowest cost.

Q5: If I need the complete fertilizer production line can you help us to build it?

A: Yes, we can help you set up a fertilizer production line and give you related professional advices as long as you need. We had already build many fertilizer production line projects in China & Oversea.
