

## Cow Manure Compost Turner Bio Fertilizer Single And Double Wheel Type

Our Product Introduction

for more products please visit us on [organicfertilizerequipment.com](http://organicfertilizerequipment.com)

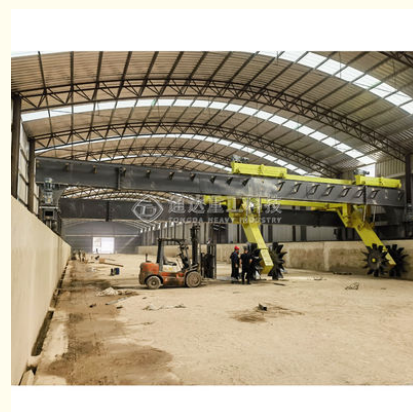

### Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLPGD-20000
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

### Product Specification

- Product Name: Wheel Type Compost Turner
- Raw Material: Organic Fertilizer Production Materials
- Usage: Fermentation Processing Equipment
- Working Width: 10-30m
- Application: Waste Organic Composting Machine
- Turning Width: 30m
- Highlight: Cow Manure Compost Turner, Bio Fertilizer Compost Turner, 30m Wheel type compost turner

## Product Description

### Cow Manure Bio Fertilizer Single and Double Wheel Type Compost Turner

Wheel type compost turner is suitable for the fermentation with large span and high depth of livestock manure, sludge and garbage, filter mud from sugar mill, biogas residue and straw sawdust and other organic waste.

|                                                                                                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Advantage                                                                                                                                                                                             |
| 1. The high turning depth: The depth can be 1.5-3m                                                                                                                                                    |
| 2. The large turning span: The largest width can be 30 m                                                                                                                                              |
| 3. The low energy consumption: Adopt unique energy efficient transmission mechanism, and the energy consumption of the same operating volume is 70% lower than that of traditional turning equipment. |
| 4. Turning width no dead angle: The turning process is symmetrical without dead angle, under the displacement of the governor shift trolley                                                           |
| 5. High degree of automation: It is equipped with fully automated electrical control system, no need operation when the turner working.                                                               |

Wheel type compost turner is a type of auxiliary equipment for organic materials fermenting and composting processes. It is composed of heavy cranes stretching across the fermenting grooves and a small crane stretching across the heavy cranes. There is a blowing device on the small crane, which consists of wheels, chains and driving system. Under the effect of chain drive mechanism, the wheel with large diameter starts to turn symmetrically. Speed-regulating trolley can shift left and right, achieving the big span composting with low energy consumption. This high-performance compost turner can process fermented organic wastes up to 3m in depth and 30m in width.

#### Product Application:

Wheel Type Composting Turner Machine are widely used in fermentation and water removal operations such as organic fertilizer plants, compound fertilizer plants, sludge and garbage factories, garden farms and mushroom plants.

1. Suitable for aerobic fermentation, it can be used in conjunction with solar fermentation chambers, fermentation tanks and shifters.
2. Products obtained from high-temperature aerobic fermentation can be used for soil improvement, garden greening, landfill cover, etc.

#### FAQ:

**Q1: Are you trading company or manufacturer?**

A: We are factory.

**Q2: How long is your delivery time?**

A: Generally it is 7-10 days if the goods are in stock. Or it is 15-30 days if the goods are not in stock, it is according to quantity.

**Q3: What is your payment method?**

A: 30% of total prices should be paid by T/T as down payment; 70% balance payment should be paid by T/T before delivery.

**Q4: How long is the warranty of your equipments? Does your company supply the spare parts?**

A: The warranty period of fertilizer equipments is one year. And we will supply the spare parts for you at lowest cost.

**Q5: If I need the complete fertilizer production line can you help us to build it?**

A: Yes, we can help you set up a fertilizer production line and give you related professional advices as long as you need. We had already build many fertilizer production line projects in China & Oversea.
