

Manure Crawler Compost Windrow Turner Automatic Chicken Poultry

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDLDF-2400
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 10-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Features: Efficient
- Product Name: Crawler Type Compost Windrow Turner
- Turning Width: 2400mm-3000mm
- Application: Fertilizer Fermentation Equipment
- Working Height: 600-800mm
- Running Speed: 50m/min
- Highlight: Crawler Type Compost Windrow Turner, Manure Crawler Compost Windrow Turner, 2400mm Compost Windrow Turner Equipment

Product Description

Automatic Chicken Manure Poultry Manure Crawler Compost Windrow Turner

The crawler type compost turning machine belongs to the ground stacking fermentation mode, and it's currently the most economical fertilizer mode for civil engineering and human resources. The materials need to be stacked in long strips, and the materials are regularly stirred and crushed by the turning machine, and the organic matter is decomposed under aerobic conditions. It also has the function of crushing, which greatly saves time and labor, greatly improves the production efficiency and product quality of the organic fertilizer factory, and greatly reduces the cost.

The composting machine can be operated not only in outdoor field but also in the greenhouse. Its main structure is made of very thick steel plate, which provides composting substrate mixer with a strong, stable body, as well as the advantages of corrosion resistance and flexible rotation.

Model	Turning width (mm)	Turning height (mm)	Max size of the raw (mm)	Engine (hp)	Capacity (m³/h)
TDLDF-2400	2400	600-1000	250	80	500-700
TDLDF-2600	2600	700-1200	250	116	1000-1200
TDLDF-3000	3000	800-1300	250	156	1300-1500

Composting usually plays an important role in organic fertilizer production. And in order to meet different requirements of different fertilizer manufacturers, If you don't want to spend money on fermentation trench, it is an excellent option. It adopts the ground windrow fermentation method, which can greatly reduce the cost of infrastructure and human power. This machine looks like a vehicle, which has a cab and two control rods. Therefore, only needs one worker, it can finish organic waste compost in a short time.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
