

Cow Dung Manure Fermentation Equipment Chain Plate Compost Turner 500m/H

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDLBF-5000
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Chain Plate Type Compost Turner
- Production Capacity: 100-500m/h
- Working Speed: 30-90m/h
- Turning Width: 5000mm
- Applicable Materials: Aerobic Composting Of Organic Solid Waste
- Highlight: **Cow Dung Manure Fermentation Equipment, Chain Plate Compost Turner 500m/h, 5000 mm Chain Plate Compost Turner**

Product Description

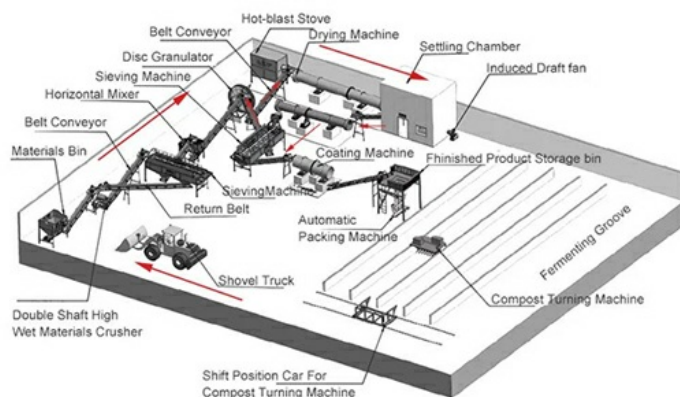

Cow Dung Manure Compost Chain Plate Compost Turner Fermentation Equipment

Chain plate compost turner fermentation equipment can efficiently shorten the fermentation period, improve the quality of products. Variable frequency speed control system can be well adapted to the change of working load. According to the material resistance, the speed of walking can be adjusted flexibly to make the equipment more adaptable and flexible. The working system of chain plate composting machine adopts frequency conversion speed regulation, so it has the characteristics of good adaptability to different materials, smooth operation, high turnover efficiency and deep groove operation.

Model	TDLBF-4000	TDLBF-5000
Turning Power(kw)	22kw*2	22kw*2
Moving Power(kw)	3	2.2kw*2
Turning Speed(m/h)	30-90	30-90
Lifting Power(kw)	3	3
Turning Width(mm)	4000	5000
Turning Depth(mm)	1800	2000
Turning Teeth Thickness(mm)	8	10

Chain Plate Compost Turner Fermentation Equipment Performance Characteristics:

1. The bracket structure with chain drive and rolling support is adopted, which has small turning resistance and saves electricity and energy, and is suitable for deep groove operation.
2. Flexible tension and elastic shock absorber are equipped with flip-flop bracket to protect transmission system and working parts.
3. The turning pallet is equipped with a removable wear-resistant curved tooth.
4. When flipping, the material stays on the tray for a long time, disperses at a high level, contacts with the air sufficiently, and is easy to precipitate.
5. Through horizontal and vertical displacement, it is possible to realize the turnover operation at any position in the tank.
6. The lifting and working parts are controlled by hydraulic system, flexible and safe.
7. Remote control of the machine's advance, lateral movement, flip and quick astern can be done remotely to improve the operating environment.
8. Trough-type material distributor, automatic discharging device, solar fermentation chamber and ventilation and aeration system can be selected.
9. Equipped with transfer machine to change groove, it can realize multi slot operation of a turn over machine and save investment.

FAQ:

Q1: Are you trading company or manufacturer?

A: We are factory.

Q2: How long is your delivery time?

A: Generally it is 7-10 days if the goods are in stock. Or it is 15-30 days if the goods are not in stock, it is according to quantity.

Q3: What is your payment method?

A: 30% of total prices should be paid by T/T as down payment; 70% balance payment should be paid by T/T before delivery.

Q4: How long is the warranty of your equipments? Does your company supply the spare parts?

A: The warranty period of fertilizer equipments is one year. And we will supply the spare parts for you at lowest cost.

Q5: If I need the complete fertilizer production line can you help us to build it?

A: Yes, we can help you set up a fertilizer production line and give you related professional advices as long as you need. We had already build many fertilizer production line projects in China & Oversea.
