

High Speed Double Axis Organic Fertilizer Mixer Machine

Basic Information

Place of Origin: China
Brand Name: TONGDA
Certification: CE,ISO
Model Number: TDSJ-8030

Minimum Order Quantity:

• Packaging Details: According to customer requirements

• Delivery Time: 5-10 days

• Payment Terms: L/C, D/A, D/P, T/T, Western Union,

MoneyGram

Supply Ability: 100 units per month

Product Specification

Product Name: Horizontal Double Shaft Mixer Machine

Production Capacity: 5-10ton/hPower: 11-22kw

Function: Mixing The Different Material

Mixing Speed: 35r/minReducer Model: ZQ350/ZQ500

 Highlight: high speed organic fertilizer mixer machine, double axis organic fertilizer mixer machine,

fertilizer mixer machine double axis

Product Description

Fertilizer Powder Mixing Equipment High Speed Double Axis Mixing Machine

Horizontal axis mixer machine is a device that uses a pair of spiral shafts with mixing blades to rotate synchronously, humidifying and stirring powdered materials while conveying them. This type of equipment has high mixing efficiency, compact structure, stable operation, and is clean and environmentally friendly.

Horizontal Double Shaft Mixer Machine Function:

- 1. Mixing batched NPK raw materials.
- 2. Equipped with a spray device on the top of the mixer, adjusting the moisture of material before granulation.
- 3. Mixing compost with beneficial bacteria.
- 4. Mixing compost with NPK.

Advantages of dual axis horizontal mixer:

- 1. The entire mixing and conveying process is carried out in a closed space, without dust leakage, and is clean and environmentally friendly;
- 2. Integrating mixing, humidification, and transportation, it has good mixing uniformity, high production efficiency, and large production capacity;
- 3. The shaft end adopts a combination seal of labyrinth and packing, which plays a dual sealing role and has a good sealing effect;
- 4. The mixing blades are made of wear-resistant materials and have undergone special surface treatment, which has high wear resistance;
- 5. The whole machine has a compact structure, small space occupation, smooth transmission, high reliability, and low noise.

Model	Production capacity (t/h)	Power (kw)	Dimension (mm)	Weight (t)
800x3000	5-6	11	3700x800x750	1.22
1000x5000	10-15	22	3200x1300x1200	4.05

Please tell us about your double shaft mixer requirements and detailed project information. Our engineers will help you to choose the type and model size. The material of the double shaft mixer can be specially designed according to your mixing medium. It can be used with ordinary steel, stainless steel.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
