

Farm Organic Compost Manure Forklift Feeding Machine High Working Efficiency

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDCW-2030
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Forklift Feeding Machine
- Application: Storage And Transportation Of Raw Materials
- Material: Stainless Steel 304
- Core Components: Engine, Bearing, Motor
- Capacity: 5-8ton/h
- Highlight: **Manure Forklift Feeding Machine, Organic Compost Manure Forklift Feeding Machine, Farm Manure Forklift Feeding Machine**

Product Description

High Working Efficiency Farm Organic Compost Manure Forklift Feeding Machine

A forklift feeding machine is a type of conveying equipment for loose materials, which can transport fine materials with particle size below 5mm and large materials with a size of over 1m. It has strong adaptability, adjustable conveying capacity, and the function of continuously and uniformly conveying various materials. Widely used in agricultural, building materials, chemical, metallurgical and other work sectors. The newly developed forklift feeder in the breeding industry has outstanding advantages such as high traction, low power consumption, low wear and tear, less material leakage, smooth operation, reliable operation, long service life, and convenient maintenance. The product structure of different manufacturers is similar in technology.

Product features of forklift feeding machine:

1. Wide adaptability of materials, adjustable conveying capacity, and continuous and uniform conveying of various materials.
2. Equipped with filter screen and mixing device to prevent material blockage
3. Widely used in industries such as agriculture, building materials, chemicals, metallurgy, etc.
4. Low power consumption, low wear, less material leakage, stable operation, long service life, and convenient maintenance.

Forklift Conveying Fertilizer Line Parameter Table:

| Model | Power | Capacity(t/h) | Dimensions(mm) |
|-----------|--|---------------|----------------|
| TDCW-2030 | Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion) | 3-10t/h | 4250*2200*2730 |
| TDCW-2040 | Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion) | 10-20t/h | 4250*2200*2730 |

Forklift feeder is composed of weighing system, chain plate conveying mechanism, silo and frame; The chain plates, chains, pins, rollers, etc. of the conveying mechanism are vulnerable parts, which are worn and deformed with different use intensities and frequencies and need to be replaced by users; The chain-plate feeder has high rigidity, can adapt to large materials of certain size, and has large silo volume, which can effectively shorten the feeding time of the forklift, but at the same time, the chain-plate transmission speed is slow and the bearing capacity is large. Forklift feeder is generally referred to as feeding, but because of the different names in different places, it has different names, and its essence and function are basically the same.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
