

5- 8 Ton / H Fertilizer Production Line Manure Organic Raw Materials Forklift Feed Bin

Our Product Introduction

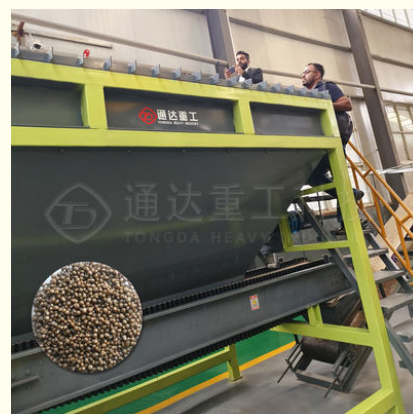

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDCW-2030
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Forklift Feeding Machine
- Application: Storage And Transportation Of Raw Materials
- Material: Stainless Steel 304
- Core Components: Engine, Bearing, Motor
- Capacity: 5-8ton/h
- External Dimensions (mm): 4250*2200*2730
- Highlight: 8 Ton/H Fertilizer Production Line, Manure Organic Raw Fertilizer Production Line, Forklift Feeding Machine For Fertilizer

Product Description

Fertilizer Production Line Manure Organic Raw Materials Forklift Feed Bin

The fertilizer forklift feed bin is a commonly used equipment for implementing automated assembly line operations, which is used to evenly or quantitatively supply materials from the storage bin or other storage equipment to the receiving equipment. Forklift feeders are often used as feeding equipment for ball mills, ore collection belt conveyors. The feeder is widely used in agriculture, coal, electronics, machinery, chemical industry, building materials, light industry, grain and other industries. In the production process, the feeder is used to quantitatively, uniformly, and continuously feed block, granular, and powder materials from the storage bin or funnel to the receiving device.

Forklift feeder machine is a type of conveying equipment for loose materials, which can transport fine materials with particle size below 5mm and large materials with a size of over 1cm. It has strong adaptability, adjustable conveying capacity, and the function of continuously and uniformly conveying various materials. This equipment is equipped with anti smashing nets, vibration anti blocking devices, mixing anti blocking devices, and variable frequency speed regulation devices, which can achieve uniform discharge and accurate control of discharge volume.

Product features of forklift feeding machine:

1. Wide adaptability of materials, adjustable conveying capacity, and continuous and uniform conveying of various materials.
2. Equipped with filter screen and mixing device to prevent material blockage
3. Widely used in industries such as agriculture, building materials, chemicals, metallurgy, etc.
4. Low power consumption, low wear, less material leakage, stable operation, long service life, and convenient maintenance.

Forklift Conveying Fertilizer Line Parameter Table:

Model	Power	Capacity(t/h)	Dimensions(mm)
TDCW-2030	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	3-10t/h	4250*2200*2730
TDCW-2040	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	10-20t/h	4250*2200*2730

Forklift feeder is composed of weighing system, chain plate conveying mechanism, silo and frame; The chain plates, chains, pins, rollers, etc. of the conveying mechanism are vulnerable parts, which are worn and deformed with different use intensities and frequencies and need to be replaced by users; The chain-plate feeder has high rigidity, can adapt to large materials of certain size, and has large silo volume, which can effectively shorten the feeding time of the forklift, but at the same time, the chain-plate transmission speed is slow and the bearing capacity is large. Forklift feeder is generally referred to as feeding, but because of the different names in different places, it has different names, and its essence and function are basically the same.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days; and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
