

Organic Fertilizer Processing Plant Equipment Loader Type Feeder Machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO, CE
- Model Number: TDCW-2030
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Forklift Feeding Machine
- Application: Agricultural Machinery Farm Machinery
- Material: Stainless Steel 304
- Core Components: Engine, Bearing, Motor
- Capacity: 5-8ton/h
- External Dimensions (mm): 4250*2200*2730
- Highlight: Organic Fertilizer Processing Plant Equipment, Loader Type Fertilizer Processing Plant Equipment, Fertilizer Forklift Feeder

Product Description

Organic Fertilizer Processing Plant Equipment Loader Type Feeder Machine

The organic fertilizer forklift feeder is composed of a weighing system, a chain plate conveying mechanism, a material bin, and a frame; The chain plates, chains, pins, rollers, and other components of the conveying mechanism are vulnerable parts that may experience wear and deformation at different intensities and frequencies of use, requiring users to replace them; The chain plate feeder has high stiffness and can adapt to large blocks of materials with fixed particle size. The silo has a large volume, which can effectively shorten the feeding time of the forklift. However, at the same time, the chain plate transmission speed is slow and the bearing capacity is large. Forklift feeder is generally referred to as feeding, but due to different names in different places, it has different names, and its essence and function are basically the same.

Production process flow of organic fertilizer equipment:

Raw material selection (pig manure, etc.) ->Drying and sterilization ->Fermentation ->Crushing ->Stirring ->Granulation ->Drying ->Cooling ->Coating ->Screening ->Measurement and sealing ->Finished product storage. The complete set of equipment mainly consists of fermentation system, drying system, deodorization and dust removal system, crushing system, ingredient system, mixing system, granulation system, and finished product packaging system; The fermentation system for livestock and poultry manure includes: feed conveyor, biological deodorization machine, mixer, proprietary flipping machine, oxygen supply system, and automatic control system.

Forklift Conveying Fertilizer Line Parameter Table:

Model	Power	Capacity(t/h)	Dimensions(mm)
TDCW-2030	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	3-10t/h	4250*2200*2730
TDCW-2040	Mixing power: (2.2kw) Vibration power: (0.37kw) Output power: (4kw frequency conversion)	10-20t/h	4250*2200*2730

Forklift feeder is composed of weighing system, chain plate conveying mechanism, silo and frame; The chain plates, chains, pins, rollers, etc. of the conveying mechanism are vulnerable parts, which are worn and deformed with different use intensities and frequencies and need to be replaced by users; The chain-plate feeder has high rigidity, can adapt to large materials of certain size, and has large silo volume, which can effectively shorten the feeding time of the forklift, but at the same time, the chain-plate transmission speed is slow and the bearing capacity is large. Forklift feeder is generally referred to as feeding, but because of the different names in different places, it has different names, and its essence and function are basically the same.

FAQ:

Q: Can I use this production line to produce multi granularity particles?

Yes, our production line is multifunctional. We can customize ring moulds of different sizes. In this way, you can easily adjust the size of your ball.

Q: I know little about the fertilizer production line. How to choose the most suitable machine?

Just tell us your raw materials, capacity (tons / hour) and the size of the final particle product, and we will choose the machine for you according to your specific situation.

Q: Our workers don't know how to operate the production line. What should I do?

Our engineers will guide on-site workers on how to install machines and build workshops. Then, our engineers will test the production line on site and train your workers how to operate it.

Q: Are you a trading company or a manufacturer?

We have a large factory in Jiaozuo, China, covering an area of 10000 square meters. Welcome to visit.

Q: What's the Production Period of the Fertilizer Machine?

For single fertilizer machine, our production time is 7 days;and for whole fertilizer production line, our production time is no more than 30 days.

Q: What's the Quality Guarantee and Certifications?

all of our machine have passed ISO and CE certification, we can guarantee the highest quality and our warranty time is 5 years after shipment date.
