1700kg/h Sawdust Grass Crusher Straw Multi Function Hammer Mill Crusher Machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE,ISO
- Model Number: TDJGF-400
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Product Name: Straw Crusher Machine
- Spare Parts: Mesh Screen+hammers
- Capacity: 80-1700kg/h
- Motor: 22kw
- Mesh Size: 2-3mm
- Voltage: 380/400/415/440V
- Highlight: **1700kg/h Sawdust Grass Crusher**, **Multi Function Sawdust Grass Crusher**, **Multi Function Hammer Mill Crusher Machine**

Product Description

Sawdust Grass Crusher Straw Multi-function Hammer Mill Crusher Machine

Straw crusher machine is a series of special equipment for wood crushing invented after years of research and design according to the needs of China's industrial production. Due to the advantages of reasonable design, compact structure, durability and high production efficiency, after popularization and use, the effect is good. The whole set of equipment is driven by only one motor, with low noise, simple structure, compact layout, low price, stable operation, low energy consumption, high output, good quality of sawdust products and low processing cost.

Straw crusher machine is a new type of woodworking machinery and equipment that is ideal for pre-production of wood series. The components of the wood shredder are mainly composed of a shell, a bearing, a screen, a transmission wheel, and a trough frame. All materials are cast from manganese steel.

The Straw crusher machine is composed of a body, a middle body and a lower body. The middle body is equipped with a triple stator ring, a crushing cutter and a fineness analyzer. The main machine adopts alloy cutter head. It has a high degree of wear resistance, which also improves production. With coarse crushing, fine crushing, and centrifugal crushing, the motor drives the rotor of the crusher to run at high speed, so that the machine generates high-speed airflow to produce high-strength impact force, compression force, and cutting force on the crushed materials, and achieves unique crushing functions.

Model	Power(kw)	Capacity(m^3/h)	Dimensions(mm)
TDJGF-400	38	4	3850*950*1050
TDJGF-600	22	3	3850*950*1050
TDJGF-800	37	3.5	3850*950*1050

Product advantages of straw crusher:

1.The size of sawdust can be adjusted in range 1-10mm by changing screen.

2.It is the necessary wood processing equipment for small and medium-sized enterprises and individual household.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control stystem while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
