

High Humidity Organic Fertilizer Crusher Semi Wet Material Crusher Machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: CE, ISO
- Model Number: TDSF-40
- Minimum Order Quantity: 1
- Packaging Details: According to customer requirements
- Delivery Time: 5-10 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Machine Name: Organic Fertilizer Semi Wet Material Crusher
- Type: Fertilizer Crusher
- Output (kg/h): 1000 - 2000 Kg/h
- Function: Material Crusher
- Color: Customers' Demand
- Advantage: Energy Saving Consumption
- Feature: High Efficiency
- Highlight: **High Humidity Organic Fertilizer Crusher, Semi Wet Organic Fertilizer Crusher**

Product Description

High Humidity Organic Fertilizer Crusher Semi Wet Material Crusher Machine

The semi wet material crusher is a professional crushing equipment for high wet and multi fiber materials, using high-speed rotating blades to crush fibers with good particle size, high efficiency, and high energy.

Semi wet material crushers are mostly used for the production and processing of organic fertilizers, and have good crushing effects on raw materials such as chicken manure and humic acid.

Model	Power(kw)	Capacity(t/h)	Crushing Granularity(mesh)	Inlet Size(mm)	Dimensions(mm)
TDSF-40	22	1-1.5	50	400*240	1200*1350*900
TDSF-40II	22*2	1-1.5	80	400*240	1250*1600*1300
TDSF-60	30	1.5-3	50	500*300	1300*1450*1300
TDSF-60II	30*2	1.5-3	80	500*300	1500*2150*1920
TDSF-90	37	3-5	50	550*410	1800*1550*1700
TDSF-120	75	5-8	50	650*500	2100*2600*2130

Detail description:

The machine allows for a moisture content of 25-50% for biological fermentation organic fertilizer materials, and the crushing particle size meets the requirements for granulation. The crushing degree can also be adjusted within a certain range according to user needs.

This machine has a grinding effect on hard substances such as glass, ceramics, bricks, and crushed stones in organic fertilizers for urban household waste, achieving a safe effect. It shortens the process flow, reduces equipment investment, and saves operating costs for organic fertilizer and compost production, making it an ideal machinery for fertilizer production and processing units.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
