

Water Soluble Fertilizer Equipment Production Line Liquid Fertilizer Humic Acid Liquid Fertilizer Production Line

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO,CE
- Model Number: TDSRF
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: According to customer requirements
- Delivery Time: 10-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Name: Humic Acid Liquid Fertilizer Production Line
- Voltage: 380V, 220V Or Customized
- Raw Material: Food Residue+animal Manure+organic Waste
- Total Power: ≈280KW
- Personnel Configuration: 3-5 People/class
- Microbial Production Capacity: 10 Tons/day
- Highlight: Water Soluble Liquid Fertilizer Production Line, Liquid Fertilizer Production Line, Humic Acid Liquid Fertilizer Production Line

Product Description

Water Soluble Fertilizer Equipment Production Line Liquid Fertilizer Humic Acid Liquid Fertilizer Production Line

The water-soluble fertilizer production line mainly includes humic acid water-soluble fertilizer, amino acid water-soluble fertilizer, large element water-soluble fertilizer, and organic matter water-soluble fertilizer.

Selection of raw materials for water-soluble fertilizer production line:

1. Fertilizers rich in N, P, and K elements, such as urea, monoammonium, ammonium dihydrogen, potassium nitrate, potassium sulfate, potassium chloride, potassium sulfate, ammonium nitrate, and phosphorus.
2. Add raw materials such as humic acid and amino acids according to the type of product.
3. Various trace elements: such as zinc, copper, borax, magnesium, iron, etc.
4. Organic matter stock solution.

Fully automatic water soluble fertilizer production line:

What is Water Soluble Fertilizer?

Water-soluble fertilizer is a kind of quick action fertilizer. Featured with good water solubility, it can thoroughly dissolve in water without residue, and it can be absorbed and utilized directly by root system and foliage of the plant. The absorption and utilization rate can reach up to 95%. Therefore, it can meet the nutritional needs of high-yielding crops in rapid growth stage.

Raw Material	With superior corrosion resistance and high wear resistance, belt conveyor is used here to deliver the raw materials. The crossbeam is made of channel steel, and the fence is made of stainless steel. Continuous supporting roller design ensures no dead end & accumulated materials, convenient to clean. Different types of conveyors are chosen based on project requirements.
Batching	Take advantage of the static measuring when batching, which makes the formula more accurate. Each ingredient has two feeding methods, fast feeding and slow feeding, controlled by frequency converter. The structure is designed according to the difference in liquidity and proportion of each ingredient. Multiple formulas can be stored in batching system, and it is easy to be modified. Batching accuracy reaches to $\pm 0.1\%$ - $\pm 0.2\%$.
Mixing	Horizontal double ribbon mixer is adopted here, which consists of motor reducer, feed inlet, upper shield, ribbon mixing device, discharging device, outlet, etc. It is generally configured with pneumatic cambered flap valve. When close the valve, the cambered flap is perfect fit with the cambered surface of the barrel. Therefore, there is no mixing dead space, better for even mixing.

Brief Introduction of Water Soluble Fertilizer Plant:

Water-soluble fertilizer production line is a new type fertilizer processing plant, which includes materials feeding, batching, mixing and packing. 3-10 kinds of ingredients are batched according to the formula and mixed evenly. Then the materials are measured, filled and packed automatically.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
