

Agricultural Machinery Organic Fertilizer Granulator Granulating Machine With Double Roller Press

Our Product Introduction

for more products please visit us on organicfertilizerequipment.com

Basic Information

- Place of Origin: China
- Brand Name: TONGDA
- Certification: ISO, CE
- Model Number: TDJZ-1.5T
- Minimum Order Quantity: 1 set
- Price: Negotiable
- Packaging Details: According to customer requirements
- Delivery Time: 5-15 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 units per month

Product Specification

- Name: Fertilizer Granulate Making Machine
- Capacity: 1-1.5t/h
- Working Method: Extrusion
- Function: Granulate
- Raw Material Moisture: 2-5%
- Granular Size: 2-6mm
- Advantage: Low Consumption High Efficiency
- Highlight: **Organic Fertilizer Granulator, Double Roller Press Granulator, Agricultural Machinery Granulator**

Product Description

Agricultural Machinery Organic Fertilizer Granulator Granulating Machine with Double Roller Press

Double Roller Press Granulator

Working principle: adopts the design solution of extrusion sliding model, the raw materials pass through double roller, after that, enter into scattering room, come out as granulation, a sieving was mounted at the bottom of the machine, which is customized according to client's requirement, last, sieve out the granules which is qualified, the rest of materials return to mixer and be re-granulated.

This machine has a wide range of raw materials, and can be used for granulating various concentrations and types of raw materials, such as compound fertilizers, machine feed, and chemical industries. It can also be used in rare earth, metallurgy, coal, biological agents, environmental protection engineering, etc. And has good applicability.

Note of double roller granulator :

Our company has different types of fertilizer granulator, including double roller granulator, wet mixer granulator, disc granulator, rotary drum granulator. We can produce you the suitable machine according to your condition.

Advantages of zinc sulphate fertilizer granulation machine / double roller granulator:

1. No drying process, normal temperature granulating, one-step forming of granulation in Double Roller Granulator;
2. Low energy consumption and no waste water or gas emission;
3. Easy operation and maintenance, no need installation of foundation for Double Roller Granulator
4. Compactor rollers adopt high chrome alloy which is resistant to corrosion, wear and impact.

Model	Power(kw)	Granule Diameter(mm)	Roller Sheet Size(mm)	Dimensions(mm)
TDJZ-1T	15	3-10	150*220	1450*800*1450
TDJZ-1.5T	22	3-10	150*300	1450*850*1500
TDJZ-2T	30	3-10	185*300	1630*850*1650
TDJZ-3T	37	3-10	300*300	1850*1100*2050

Supports customization:

Roller material: Roller can be customized, the material is high chrome 13/304 stainless steel, by the surface dip treatment, corrosion and wear resistance effect is quite good

Dispersing device: A dispersing device can be added to the inlet and outlet to prevent raw materials and finished products from sticking together.

Paintbrush: Add brushes under the roller to prevent materials from sticking to the roller .

Universal customization: motor, color, LOGO, voltage customization 110/220/380V

If you have other needs, please contact us and we can help you!

Double Roller Fertilizer granulator machine:

This roller granulator machine can process many types fertilizer (organic fertilizer, inorganic fertilizer(NPK), biological fertilizer, magnetic fertilizer, etc.). Especially to make rare earth, potassium fertilizer, and ammonium bicarbonate series compound fertilizer.

1. The granules ball rate more than 85-95% .
2. The granules size:3-10mm .
3. The fertilizer granules compressive strength:10-25N.
4. Raw material moisture:>10%.

Pre-sale:

1. Our account manager will communicate with you the product requirements related to your machine.
2. We offer free product plans, packaging drawings and 3D renderings to save your budget.
3. We will provide our own quotation and proof of our machines.
4. We have a professional R & D department, to provide you with the most professional technical support.
5. We can make granulation experiment according to your raw materials.

FAQ:

1. Are you trading company or manufacturer ?

We are a manufacturer with a history over 40 years and have realized one-stop service for design, manufacture, installation, debugging and technical training.

2. How long is the delivery time?

For standard machines or Components, it would be 5-10 days; For non-standard machines and customized machines according to clients specific requirements, it would be appointment time.

3. Do you arrange shipment for the machines?

Yes, we will do that. For FOB or CIF price, we will arrange shipment for you. For EXW price, we will assist you in arranging shipment.

4. How about your product after-sales service?

Normally we provide video and written technical support. If necessary, our engineers can also provide on-site service. Our product accessories can be selected according to the actual needs of the customer to choose the most appropriate way to deliver.

5. What kinds of certificate you have?

ISO 9001: 2015 SGS and we can make other certificates according to customers' detailed requirements.

6. How to guarantee the quality and operation before loading?

We have our own quality control department and have advance quality control system while from raw materials to finished products. All the machines and production lines shall be 100% checked and tested before delivery.
